TUTORIAL
SpringerLink平台使用指南

Welcome to SpringerLink

link.springer.com 平台主页

超过一千万种科学资源可供探索，包括期刊、电子图书、会议论文和视频

The screenshot shows the Springer Link homepage with several key features highlighted by callouts:

- 登录 (Sign-in)**: Located at the top right of the page.
- 使用英语或德语进行浏览**: Located at the top right, pointing to the language selection dropdown.
- 响应式搜索功能**: Points to the search bar at the top left.
- 按出版
物类型
浏览**: Points to the text "journals, books, series, protocols, reference works and proceedings" in the main banner.
- 按照学科浏览
内容**: Points to the "Browse by discipline" sidebar on the left.
- 精选期
刊与图
书推荐**: Points to the "Featured Journals" and "Featured Books" sections.

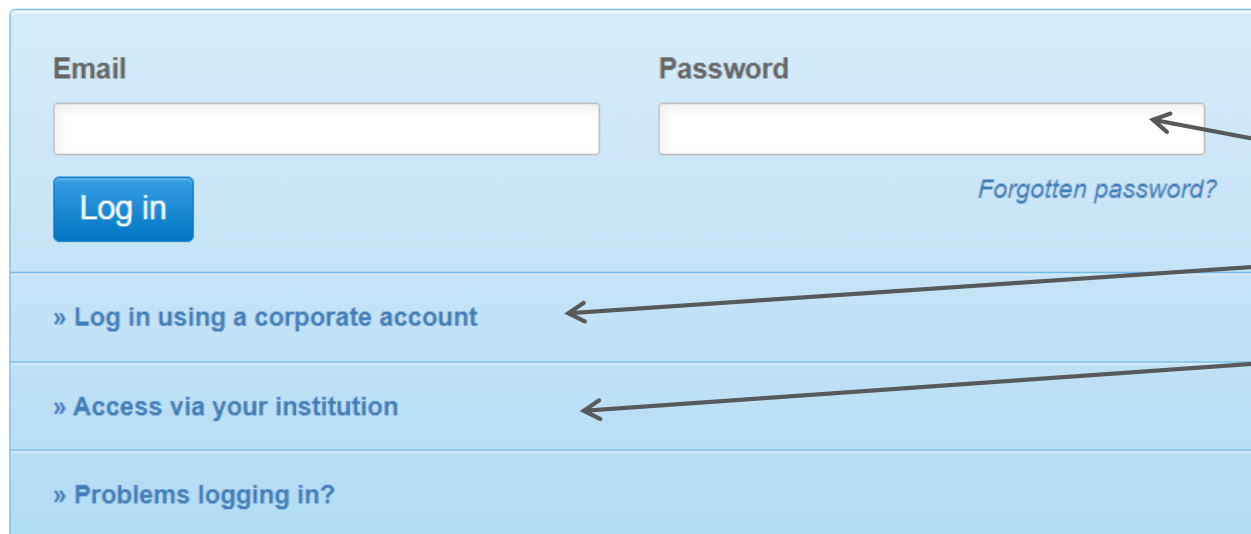

The main banner text reads: "Providing researchers with access to millions of scientific documents from journals, books, series, protocols, reference works and proceedings." Below this, it states: "New books and journals are available every day."

The sidebar lists various disciplines for browsing, including Biomedicine, Business and Management, Chemistry, Computer Science, Earth Sciences, Economics, Education, Engineering, Environment, Geography, History, Law, Life Sciences, Literature, Materials Science, Mathematics, Medicine & Public Health, Pharmacy, Philosophy, Physics, Political Science and International Relations, Psychology, Social Sciences, and Statistics.

The bottom of the page shows "Browse 15,602,363 resources" and "Articles 8,365,663". The Springer Nature logo is visible in the bottom right corner.

获得平台授权的机构用户登录方法

根据用户所在的不同空间位置，SpringerLink平台的登录方法可以划分成以下两大类：

1) 在校或者到馆登录

学校和图书馆的IP范围已得到平台授权，用户通过台式电脑、笔记本电脑或者IPAD、手机等各种移动终端连接到学校或者图书馆的网络，即可自动获得平台访问权限。直接输入网址即可登录<https://link.springer.com>。

2) 远程登录

远程登录方法一：VPN 代理登录

用户在台式电脑、笔记本电脑或者IPAD、手机等各种移动终端上，通过VPN连接到学校或者图书馆的内部网络环境，即可自动获得平台访问权限。直接输入网址即可登录<https://link.springer.com>。

获得平台授权的机构用户登录方法

远程登录方法二：CARSI (教育网) 远程认证登录 (教工号、学号认证登录)

点击右上角“Sign up/ Log in”后，选择“Access via your institution”，然后在出现的搜索框中输入学校英文名称。完成后，页面将自动跳转至大学统一身份认证系统页面，输入本人账号和密码登录，即可使用SpringerLink平台资源。

Access through your institution

Access subscription content by using your institution's login system

Abstract (9)

Kawasaki disease (KD), an enigmatic medium vessel vasculitis, presents as an acute febrile illness predominantly affecting young children. KD appears to be a hyper-inflammatory response elicited by environmental or infectious agents (including respiratory viruses) in genetically predisposed individuals. Numerous reports from the current era of severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) pandemic have described the occurrence of KD/KD-like illness in close temporal proximity to SARS-CoV-2 infection or exposure. Notably, KD has been reported in association with H₁N₁-pdm09 virus that caused the previous pandemic a decade ago. Non-H₁N₁ influenza infections as well as influenza vaccination have also been reported to trigger KD. Herein, we report a case of H₁N₁-pdm09 influenza who developed KD. We review the published literature on influenza infection or vaccination triggering KD. This may help in a better understanding of the KD/KD-like illness associated with SARS-CoV-2. Besides, we also evaluate the safety of aspirin in influenza-triggered KD as aspirin administration in children with influenza is associated with the risk of development of Reye syndrome.

Introduction (10)

Kawasaki disease (KD) is an acute febrile vasculitic disorder of childhood predominantly affecting medium size arteries with a predilection for coronary arteries. KD is now the leading cause of acquired heart disease in children worldwide [1]. The illness was first reported by Dr. Tomisaku Kawasaki, a Japanese pediatrician, in 1967 when he reported a series of 50 patients [2]. Classic or 'complete' KD clinically presents with fever for at least 5 days with four of the following clinical manifestations: edema of hands and feet in the acute stage and/or subacute

(5) Clinical Rheumatology is an international English-language journal devoted to publishing original clinical investigation and research in the general field of rheumatology with accent on clinical aspects at postgraduate level.

The journal succeeds Acta Rheumatologica Belgica, originally founded in 1945 as the official journal of the Belgian Rheumatology Society. Clinical Rheumatology aims to cover all modern trends in clinical and experimental research as well as the management and evaluation of diagnostic and treatment procedures connected with the inflammatory, immunologic, metabolic, genetic and degenerative soft and hard connective tissue diseases. — [show all](#)

Perioperative Preparation of NOSES (3)

Xishan Wang, Yinggang Chen, Lei Yu & Rui Huang (4)

Chapter | First Online: 29 May 2021 (5)

516 Accesses (6)

Abstract (7)

Preoperative preparation, especially bowel preparation, is a routine procedure before colorectal examinations and surgeries. Bowel preparation aims to clean the bowel and facilitate surgeries. With the popularization of Enhanced Recovery After Surgery (ERAS), the contents of preoperative preparation are constantly adjusted and improved. However, due to the particularity in the surgical procedures of NOSES, preoperative preparation is still vitally important. It involves many aspects including bowel preparation, vaginal preparation for females, and psychological preparation for patients. The most satisfactory surgical effects cannot be achieved without a comprehensive preoperative preparation.
